PROFESSIONAL SUMMARY

Software Developer with internship experience in C#, .NET MVC, RESTful API integration, Sitecore CMS, Docker, Azure DevOps, Agile/Scrum, troubleshooting, and AI-assisted development. Skilled at reading unfamiliar code, validating application behavior, supporting deployments, researching technical issues, and communicating work through demos and walkthroughs.

TECHNICAL SKILLS

Languages: C#, Java, Python, C++, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks/Platforms: .NET MVC, Angular, Sitecore CMS, WordPress, Docker, Azure DevOps

APIs/Tools: RESTful APIs, Git, GitHub, GitLab, GitHub Copilot, Maven, Visual Studio, VS Code

Testing/Concepts: JUnit, Pytest, unit testing, debugging, refactoring, Agile/Scrum, OOP, SOLID, MVC, prompt engineering

EXPERIENCE

Medical Mutual

Cleveland, Ohio

IT Summer Intern

May 2026 – Aug. 2026

- Integrated an updated RESTful API into a .NET MVC application by updating configuration values, modifying controller logic, testing connectivity, and preserving existing behavior.
- Read and traced unfamiliar C# code to understand application flow, troubleshoot issues, validate endpoint behavior, and document findings through spike-style research.
- Configured Sitecore CMS items and connected new product entries to backend logic, including custom effective dates, enrollment flow behavior, and job-control flags.
- Used Docker containers to run application services locally and Azure DevOps to access repositories, coordinate code changes, and support deployments.
- Contributed to Agile/Scrum stories through code research, demos, walkthroughs, testing, and AI-assisted development.

Zone Aviation

Remote

Website Designer

2025

- Maintained and updated a live business website by coordinating with the client, gathering requirements, and applying content, pricing, navigation, and layout changes.
- Managed backups, local testing, updates, SSL/security concerns, and production-safe website changes.

PROJECTS

Capstone: Texas Hold'em Trainer

- Built a Python-based poker trainer that simulates heads-up Texas Hold'em hands and helps users practice push/fold decisions using probability, stack management, and game-state logic.
- Developed and debugged core logic for blinds, betting flow, community cards, stack updates, all-in scenarios, and showdown results through a team-based GitLab workflow.

Angular Portfolio Redesign

- Rebuilt a personal developer portfolio using Angular to improve structure, routing, maintainability, and long-term extensibility.
- Created reusable components and data-driven sections for experience, projects, contact information, and project archives.

Open-Source Unit Testing

- Wrote unit tests for real Java open-source libraries including AssertJ and Apache Commons Text.
- Applied equivalence partitioning, boundary value testing, mock testing, Maven builds, and pull-request workflow.

EDUCATION

Bowling Green State University

Bowling Green, Ohio

B.S. in Software Engineering

Expected Graduation: August 2026

- **GPA:** 3.75/4.00, *Dean's List, Magna Cum Laude, Member of Cyber Security Club*
- **Relevant Coursework:** Software Engineering Capstone, Software Testing, Software Security, Database Systems, Programming Languages, Network Architecture
